DETAILED ACTION

Response to Amendment

The amendment in response to the 11/1/2006 Office action has been entered. The amendment to the specification is sufficient to overcome the objection set forth on page 2 of the last Office action. Claims 3 and 28 have been cancelled. .

Claim Rejections 35 USC 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Claims 1, 2, 4-7, 12-18, 20, 21, 24-27, 29-32, 37-43, 45, 46, 49, and 50 are rejected under 35 USC 103(a) as being obvious over WO 01/31131 to Zeng in view of Adiletta (US 4671979) substantially as set forth in the November 1, 2006, Office action.

Response to Arguments

Art Unit: 1771

Applicant's arguments presented 2/23/ 2007 have been considered but are not deemed to be persuasive.

The argument that Zeng teaches away from the present invention is not found persuasive as Zeng teaches that merely providing formaldehyde binders is not desirable and then goes on to teach that providing multicomponent binder fibers improves the insulation properties of the materials disclosed therein. Zeng expressly suggests using scrap glass fibers in combination with binder fibers and the advantages associated with such a combination.

The Office maintains that Zeng's express suggestion to use scrap wool glass fibers would have been appreciated by the skilled artisan to include glass fibers either treated or untreated with formaldehyde binders when combined with polymeric binder fibers.

The arguments as to Zeng and Audiletta individually are unpersuasive as the rejection is based on the combined teachings of the references as has been clearly set forth on the record in this application.

The declaration of Yang has been considered but is not found to be persuasive as the claimed invention is obvious from the teachings of the prior art as Zeng teaches the desirability of combining glass fibers (including scrap glass fibers) with binder fibers in order to provide enhanced insulation properties to such materials. Note the first paragraph of Zeng's Summary of Invention.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1771

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
